

Avenue Junior School
Administration of Medicines in School Policy

AVENUE JUNIOR SCHOOL

ADMINISTRATION OF MEDICINES IN SCHOOL POLICY

Avenue Junior School
Administration of Medicines in School Policy

1.INTRODUCTION TO THE POLICY

The administration of medicines to children is the responsibility of parents. There is no legal duty that requires staff to administer medicines. No child under 16 should be given medicines without their parent's written consent.

The purpose of this policy to ensure the safe storage, administration and recording of medicines where it is necessary for the school to undertake this responsibility.

Sets of circumstances in which requests may be made to school staff to deal with the administration of prescribed medicines to children in school include:

- cases of chronic illness or long-term complaints, such as asthma, diabetes or epilepsy;
- cases where pupils who are recovering from short-term illnesses are well enough to return to school, but are receiving a course of prescribed medication such as antibiotics.

Very few courses of medication are likely to require medicine to be taken during school hours. When the prescribed dosage does indicate the need for medicine to be taken at times when the child is at school on a long term basis, the school would develop a care plan for the child alongside parents and the nursing team/GP where necessary.

This policy is supported by Supporting Pupils with Medical Conditions Policy, Asthma Policy and Intimate Care Policies and Procedures.

THE HEADTEACHER'S RESPONSIBILITY

The Headteacher and school staff cannot be required to administer medicine, but as persons *in loco parentis* they must take appropriate action when a child in their care is ill. They must secure either the attendance of a parent or get medical assistance.

Avenue Junior School
Administration of Medicines in School Policy

When a parent requests that medicine be administered to their child at school, the Headteacher will deal with the case of each circumstance sympathetically and on its merits. The Headteacher will consider all the circumstances of the case and have regard to the best interests of the pupil and the implications for the staff.

The Headteacher will ensure all staff are aware of the school's policy and practice with respect to the administration of medicines. In the case of pupils with known medical problems, staff who come into contact with that child will be made aware of the precautions that need to be taken and the procedure for dealing with an emergency.

The Headteacher will ensure that a clear written statement of the school's organisation and arrangements for the administration of medicines is available on the website, including a statement of their responsibilities and how to make a request for medicines to be given at school.

Where medicines are to be administered at the school, the Headteacher will ensure that a named person is responsible for medicines, together with a nominated deputy. These members of staff will be suitably trained to undertake the responsibility.

Whichever member of staff undertakes duties concerned with the administration of medicine in the school, within the terms of their job description, the Headteacher will ensure that person has appropriate information and training to undertake the duties.

Where any doubt exists about whether or not to agree the administration of a particular course of medication in school, the Headteacher will seek advice from the School Nursing Team/One Norfolk.

The Headteacher will ensure an adequate number of staff undertake and update relevant training.

THE RESPONSIBILITY OF STAFF

Avenue Junior School
Administration of Medicines in School Policy

Any member of staff who agrees to accept responsibility for administering prescribed medicines to a child should undertake and update appropriate training and guidance. They should also be aware of possible side effects of the medicines and what to do if they occur.

All staff will be aware of the need for asthmatics to carry medication with them (or for the teacher to keep safe and ensure that medication is instantly available and accessible) when, for example, participating in outdoor physical education or in the event of an evacuation or fire drill.

All staff will be aware of and undertake training to deal with children under their care with potentially life-threatening allergies. They will also ensure the constant availability to those children of their necessary medication.

Staff will complete and sign **Form AJS Med 1** to record each time medicine is administered to an individual child.

All staff should be aware of and work to the guidance within this policy.

THE PARENTS' RESPONSIBILITY

Parents have the prime responsibility for their child's health and should provide the school with information about their child's medical condition. Medicines should only be brought to and handed in to the school when essential; that is where it would be detrimental to a child's health if the medicine were not administered during the school day.

It is preferable that parents administer medicine to their children. In cases where this is not possible, parents may make a request for medicine to be administered to the child in school.

Where such a request is made to the school by parents, it should be in writing on **Form AJS Med 1** and to the effect that the child's doctor considers it necessary for the child to take medicine during school hours.

Avenue Junior School
Administration of Medicines in School Policy

The school will only accept medicines that have been prescribed by a doctor, dentist, nurse prescriber or pharmacist prescriber, unless the medicine is an analgesic or cream (see Section 6.1). Parents should always ensure that medicines are provided in the original container as dispensed by a pharmacist and include the prescriber's instructions for administration and dosage.

It only requires one parent to agree to or request that medicines are administered. Where parents disagree over medical support, the school should continue to administer the medicine in line with the consent given and in accordance with the prescriber's instructions, unless and until a Court decides otherwise.

Parents are responsible for ensuring that date-expired medicines are returned to a pharmacy for safe disposal. They should also collect medicines held at the end of each term. If parents do not collect all medicines, a member of staff should take them to a local pharmacy for safe disposal.

ADMINISTERING PRESCRIBED MEDICINES

The following information **MUST** be made available before the school can agree to the request for them to administer medication:

- Evidence of the medication having been prescribed e.g. bringing the bottle/box that the medicine has been dispensed in for the school to view (the school will not accept medicines that have been taken out of the container as originally dispensed, or where changes to dosages have been made by the parents).

A completed form **Form AJS Med 1** (provided at the school reception), confirming:

- parents' request and agreement for the school to administer the medicine
- confirmation of prescribed dose and times of required administration of doses

Avenue Junior School
Administration of Medicines in School Policy

- confirmation of the date and time that the last dose was given (on a *daily basis*, if more than one days' administration is required) e.g. to ensure the correct administration of antibiotics and analgesics
- side effects of the drug and what side effects warrant medical attention

The school reserves the right to refuse to administer medication where this information has not been made available.

Where the administration of prescription medicine may be required in an emergency, the parent must meet with the Headteacher in order that an individual care plan can be formulated, staff training organised and **Form AJS Med 1** completed by parents.

If the parents are unavailable or refuse to complete **Form AJS Med 1** the Headteacher will make clear to the parents/guardian (in writing), that the school is acting *in loco parentis* and that staff are therefore entitled and obliged, in an emergency, to take whatever action they think best in the light of the facts known to them.

The medicine, in the smallest practical amount (in the original container), should be delivered to school, by a parent/ guardian, and should be handed personally to the school office. *Children are not allowed to bring their own medication to school as this may constitute a risk to other pupils and deny the school the opportunity to clarify details.*

Parents should ensure the container (the original container) is clearly labelled with the contents (i.e. the name and the dose of the medication), the child's name, the dosage and/or instructions. The receiving member of staff will check that the instructions are clear and can be understood.

In the cases where children require medication over long periods of time, any change in the dosage or other arrangements must be notified by parents/guardians, in writing, to the Headteacher.

Parents/guardians should also ensure the child is familiar with the dosage and, subject to age and physical and mental capacity, is able to have medicine administered to them under adult supervision.

Avenue Junior School
Administration of Medicines in School Policy

Any appropriately trained member of staff giving medicines to a child should check for and cross-reference against the parental permission form:

Form AJS Med 1:

- The child's name
- prescribed dose
- method of administration
- written instructions provided by the prescriber on the label or container
- date and time last dose was given
- drug side effects
- expiry date

If in doubt about any procedure staff should not administer the medicines but check with the parents or a health professional before taking further action. If staff have any other concerns related to administering medicine to a particular child, the issue should be discussed with the parent, if appropriate, or with a relevant health professional and the Headteacher informed.

Where a number of pupils may be taking regular medication at any one time, a suitably trained member of staff will be appointed as a Medicines administration co-ordinator to monitor and record routines.

A record, on **Form AJS Med 1** for the administration of medicines will be kept in the school, parents advised about doses given (or refused by the pupil) and advice on appropriate procedures will be sought as necessary from the School Nursing Team/One Norfolk.

NON-PRESCRIPTION MEDICINES

In general, non-prescription medicines will not be administered. However, examples of non-prescription medicines which will be administered include analgesics (pain relief) and creams.

Staff will never give a non-prescribed medicine to a child unless there is specific prior written permission from the parents, using **Form AJS Med 1**.

ADMINISTRATION OF ANALGESICS TO PUPILS

In circumstances when pupils suffer headaches, menstrual pains or toothache, the Headteacher or another member of staff may be asked by parents to provide a mild analgesic (e.g. paracetamol) to relieve pain.

Analgesics will only be given to pupils under the age of 16 when parents have given prior written permission on **Form AJS Med 1**. In such cases, specific members of staff will be authorised to issue liquid paracetamol.

Circumstances, under which it might be appropriate for the Headteacher to seek such permission from parents/guardians, would include residential visits organised by the school.

On no account will Ibuprofen, Aspirin or preparations containing aspirin be given to pupils at AJS unless prescribed by a doctor. This is particularly important in pupils under the age of 12 years.

If no written confirmation of the date and time of any previous doses has been given to the school, staff will attempt to contact the parent /guardian for confirmation of this. Staff will not administer any analgesic to a pupil who has been less than 4 hours in school.

Preparations of paracetamol designed specifically for children for those under 12, will be kept in a secure place and not in First Aid boxes.

Parents will be given written notice of the date, time and dose of any analgesic administered by the school. This will be recorded on **Form AJS Med 1** and sent home to parents.

In order to avoid the risk of improper use, pupils must not bring their own supplies of analgesics to school.

If a child suffers regularly from acute pain the parents should be encouraged to refer the matter to the child's GP.

Asthma (see Asthma Policy for full details)

Avenue Junior School
Administration of Medicines in School Policy

When a child joins the school, parents must complete Appendix 2 to confirm whether or not their child requires medication for asthma. Additional forms must be completed if this is the case (Appendix 3)

Parents/carers MUST inform the school, in writing, if their child is prescribed an inhaler or other treatment *after* commencement at the school, and their name will also be included on the Register.

Children are encouraged to carry their reliever inhaler as soon as they are responsible enough to do so. We would expect most children in Key Stage 2 to be able to do this. However, we will discuss this with each child's parents or carer if this is not appropriate. We do also ask for a spare inhaler to be retained in the class medical box, so that they are always available and accessible to staff.

Children on the Asthma Register are expected to have an inhaler available to them at all times. Their names will not be removed from the register unless the School receives from a parent/guardian confirmation that a medical practitioner has deemed the prescription to be no longer necessary. This confirmation must be provided to the school in writing.

The Human Medicines (Amendment) (No 2) Regulations 2014 allows the school to keep a salbutamol inhaler for use in emergencies. This can only be administered to a child where parental permission has clearly been indicated on the Asthma Care Plan. The school will follow the protocols outlined in the Department of Health "Guidance on the use of emergency salbutamol inhalers in schools" September 2014.

Supporting children with medical conditions in school (see Supporting Pupils with Medical Conditions Policy for full details)

All children with a medical condition will have a care plan in place agreed by parents and the SENDCO and supported by a relevant health professional.

Anaphylaxis and allergic reactions

Avenue Junior School
Administration of Medicines in School Policy

Pupils who may experience an extreme reaction e.g. to foodstuffs or wasp stings, will require an individual care plan and the relevant medication must be stored in the child's classroom medical box and taken with the class whenever the child leaves the building/goes to a different area of the school.

All staff should have regular training to ensure they are able to recognise signs of an allergic reaction and follow emergency procedures including administration of life saving medication if necessary.

The school has spare Epipens located in the medical room which can be used in an emergency.

Intimate Care (see Intimate Care Policy)

The school follows the NCC Intimate care protocol and will support and provide appropriate facilities for children requiring such care. In line with safeguarding policies, two members of staff will always be required to assist with intimate care. A care plan will be in place.

STORING MEDICINES

Large volumes of medicines should not be stored. Staff should only store, supervise and administer medicine that has been prescribed for an individual child. Medicines should be stored strictly in accordance with product instructions (paying particular note to temperature) and in the original container in which dispensed. Where a child needs two or more prescribed medicines, each should be in a separate (original) container.

Medicines, with the exception of inhalers, will be kept in a locked cupboard. Under no circumstances will medicines be kept in first aid boxes. Inhalers are in most cases to be kept by the child in the classroom in a place that is immediately accessible.

Avenue Junior School
Administration of Medicines in School Policy

Children should know where their own medicines are stored and who holds the key. All emergency medicines, such as asthma inhalers and adrenaline pens, should be readily available to children and should not be locked away. This school allows most children to carry their own inhalers, but this is not the case for children with adrenaline pens. In the case of anaphylactic shock, it is important that an adult is able to locate the adrenaline pen quickly and ensure that it is administered as soon as possible. These should be kept in the **red labelled Medicines Box** along with care plans. Staff are responsible for ensuring all medicines are kept securely.

A few medicines may need to be refrigerated. They will be kept in a refrigerator in the main office in an airtight container and clearly labelled. There should be no access by children to a refrigerator holding medicines.

Where a pupil's case makes it necessary, emergency supplies of drugs will be stored in the school, but only on a single dose, named patient basis. In these cases, specific training on how and when to administer will be sought from the School Nursing Team where appropriate.

DISPOSAL OF MEDICINES

Medicines no longer required will not be allowed to accumulate at the school. They will be returned to the parent in person for safe disposal. Parents are responsible for ensuring that date-expired medicines are returned to a pharmacy for safe disposal. They should also collect medicines held at the end of each term. If parents do not collect all medicines, a member of staff should take them to a local pharmacy for safe disposal.

CONSENT FOR TREATMENT

Avenue Junior School
Administration of Medicines in School Policy

For pupils of this school, obtaining parental consent does not constitute a difficulty; normally the parent or guardian will make the decision. However, the problem may be urgent or the parent cannot be contacted e.g. when the pupil is abroad on a school journey. In such circumstances the school is acting *in loco parentis* and staff are therefore entitled and obliged, in an emergency, to take whatever action they think best in the light of the facts known to them.

If a child is being taken on a school journey where medical treatment may be needed and the parent is not prepared to give written instructions and an indemnity on the subject of medical treatment, the school may decide that the pupil should not go on the journey.

Parents who belong to religious bodies that reject medical treatment should make their views and wishes known to the school so that the implications of their beliefs can be discussed and, if possible, accommodated. In an emergency situation, the methods of treatment desired by the parent may not be available and it is a proper and reasonable decision for the Headteacher, acting *in loco parentis*, to have recourse to traditional medical treatment if the circumstances make it absolutely necessary. However, the Headteacher will not seek to override parental/guardian wishes and, if agreement cannot be reached on this issue, the pupil will not be taken on the journey.

DISSEMINATION OF THE INFORMATION WITHIN THIS POLICY

The Headteacher will ensure that parents / guardians and staff are familiar with the arrangements set out in this Policy Statement. It will be published on the website.

REVIEW OF THE POLICY

This School Policy Statement will be reviewed at least every 3 years. Any modifications to the Policy will be appropriately consulted upon and put before the whole Governing Board for approval.

Date:

Dear Parent/Carer

ASTHMA RECORD – THIS MUST BE COMPLETED FOR ALL PUPILS

The Staff at Avenue Junior School take asthma very seriously. In order to have an up to date record of care we require **all** parents to inform us whether or not their child is asthmatic. The record will help the school staff to ensure that pupils with asthma receive the best possible treatment at all times.

For those children who do have asthma, an asthma record (attached) must be completed and returned to the school as soon as possible. So that children have access to their inhaler at all times, we require **two** inhalers to be kept in school.

One which your child will carry with them and one which will be kept in the class medical box. This is to ensure that staff will always be able to access your child's inhaler and to avoid relying on the child being able to say where it is. All inhalers must be in date and labelled by your pharmacist with your child's name and dosage details. They must also be accompanied by a medicines consent form.

Even though your child may not have used an inhaler for some time; it cannot be assumed that they no longer require their inhaler. Even if your child has seen a doctor and it has been medically confirmed that they no longer require asthma medication, the school cannot remove them from the asthma register until we have had written confirmation. It is important that you notify the school of any changes.

Please complete the slip below and if necessary the attached asthma care plan and return to school by

Avenue Junior School
Administration of Medicines in School Policy

Once you have confirmed your child has asthma Louise Gibbs, our medicine administrator, will send out an Asthma Plan template for you to complete with your child as supported by Asthma UK and a medicines administration form. This will be added to their Asthma Record to ensure we have as clear a picture as possible about each individual child with asthma.

If you have any questions, please do not hesitate to contact me.

Yours faithfully

Mike Hooper
Head of School

Please complete the following information in all instances

Asthma Register 2021/22

Name of child

Please tick the appropriate box:

My child has asthma and I have completed the Asthma Record Care Plan overleaf

My child does not have asthma

Signed.....Parent/Carer

Date.....

Avenue Junior School
Administration of Medicines in School Policy

Appendix 3

Avenue Junior School

Asthma Record (Care Plan)

Please complete and return to the school office

Please tick the relevant boxes:

- ☐ I can confirm that my child has been diagnosed with asthma/has been prescribed an inhaler.
- ☐ My child has a working, in-date inhaler, clearly labelled with their name, which can be kept in the class medicines box.
- ☐ My child has a working, in-date inhaler, clearly labelled with their name, which can be kept in their classroom drawer or bag.
- ☐ In the event of a severe asthma attack, I am happy for my child to receive up to 20 puffs of their reliever inhaler via a spacer until they get further medical help.
- ☐ If my child's inhaler is not available or is unusable, I consent for my child to receive Salbutamol from an emergency inhaler held by the school for such emergencies.

Child's Name: _____

Date of Birth: _____
